1. Approximately 5 kilometers from Vac beside the local Vac-Veresegyház railroad, an important reserve fuel supply belonging to the Hungarian army is located. The fuel dump is directly opposite the Mariaudvar station. Fuel is stored in underground tanks which are hidden by sown grass, and only ventilation apertures are visible. The storage capacity is 40,000 hectoliters. There is a guard of 30 soldiers and an officer.
2. Towards mid-1950, the size of coal storage dumps at railroad stations on the Debrecen-Karczag line was doubled.
